1) This action is in response to Applicant's letter received December 19, 2003. The amendments have been entered and the arguments of record have been considered.

- 2) The text of those sections of title 35 U.S. code not included in this action can be found in a prior Office action.
- 3) Claims 1, 4-7, and 9-11 remain withdrawn from further consideration by the Examiner, 37 CFR 1.142(b), as being drawn to nonelected inventions presented in parent file 09/317,221, and herein all the claims are substantially the same as they are in the parent case.
- Claims 2, 3, 8 and 12 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Lawrence et al. See, inter alia, column 8, lines 43-57. Applicant's argument that this reference fails to provide gain guiding, is in error. The signal of this reference is in a single mode and a single mode of a multi-core fiber is excited. The pump overlays the signal and thus must provide gain guiding. While Applicant's disclosure presents another manner of gain guiding, this does not negate the mode guiding disclosed by Lawrence et al.

Applicant's argument that the Lawrence et al reference is mischaracterized or leads one to draw conclusions which are untrue, and is not applicable to amplifiers, is not cogent. The Lawrence patent's disclosure teaches what it explicitly describes (apologies to Yogi Bera). Mere argument that the underlying reference is not relevant fails to consider Lawrence et al a whole. This patent discloses operation in a clad fiber with a doped core with overlaid signal and pump radiation. Thus, the disclosure of Lawrence et al meets the broadly claimed invention.

Application/Control Number: 10/645,662

Art Unit: 3662

Claims 2, 3, 8 and 12 are also rejected under 35 U.S.C. 102(e) as being clearly anticipated 4) by Valentin et al. The arguments presented in section 3 above are incorporated herein by reference. Applicant's asserts that Valentin confuses the topic by referring the cladding as multimode core. Again, when this reference is considered as a whole, one skilled in the art is not confused, and the claimed invention is disclosed by this reference.
